

## Flow Chart<sup>1</sup> of the Final Round: Connecticut Debate Association, Pomperaug High School, January 11, 2020

### Resolved: The US should not target and kill foreign government officials.

The Final Round was between the Simsbury team of Harry VanDyke and Jack Pitblado on the Affirmative and the Amity team of Jack Tajmajer and Robert Farbman on the Negative. The debate was won by the Negative.

### Format Key

It's hard to reproduce notes taken on an 11" by 14" artist pad on printed paper. The three pages below are an attempt to do so. The first page covers the constructive speeches, the second page covers the cross-ex, and the third page covers the rebuttal. The pages are intended to be arranged as follows, which is how my actual flow chart is arranged:

Note that the first page containing the constructive speeches always has arguments related to the Affirmative contentions at the top, and those relating to the Negative contentions at the bottom. This is not how the speeches may have been presented, in that often a speaker will deal with Negative arguments prior to the Affirmative. The “transcript” version of my notes lists the arguments in each speech as presented.

The chart uses “A1,” “N2,” etc. to refer to the Affirmative first contention, the Negative second contention and so forth. Other abbreviations may be introduced in parentheses after frequent terms, for example, “United Nations (UN)”

First Affirmative Constructive	First Negative Constructive	Second Affirmative Constructive	Second Negative Constructive
1) Introduction 2) Statement of the Resolution 3) Definitions a) “targeted killing” is assassination or toppling of governments b) “governments” are those recognized by the UN c) “officials” are those elected or appointed 4) A1 <sup>2</sup> : Banning targeted killing holds US leaders accountable a) Avoids excessive use of power i) E.g., killing of Qassem Suleimani led to increased tension with Iran and missile strikes b) Currently the executive has too much power to use force 5) A2: Targeted killing creates instability a) Killing officials creates a power vacuum b) This increases terrorism and opposition i) E.g., Iraq protests, gov’t vote to ask us to leave ii) E.g., US sending in more troops 6) A3: US is not the “world police” a) US does not have the right to take these actions b) It’s an abuse of military power c) US shouldn’t act alone: we need allies	1) Intro 2) Resolution 3) Negative accepts the definitions 4) A1: Aff provides no means of enforcement a) Presidents have ignored laws and avoided Congress in the past 5) A2: Aff harms are non-unique a) The US has caused instability and opposition in other ways b) E.g., invasion of Iraq	1) Intro 2) Resolution 3) A1: US should put this weapon aside a) Assassination should require approval by the international community b) UN should review the intelligence 4) A2: Iraq and Vietnam demonstrate that we cause instability by our actions 5) A3: We should not use “world police” excuse to push a US agenda 6) N3: Use of this option in the past has caused harm	1) We believe the 2 <sup>nd</sup> Affirmative has conceded our case! a) They agree assassination can be a useful tool in some cases b) They just want to put it under the control of the international community. 2) The evidence we cited from the packet comes from articles that appeared in The Guardian and The New York Times a) Aff hasn’t cited articles or page numbers either 3) A1: Accountability will not increase a) President’s will continue to overreach and impeachment has never been successful 4) A2: Iran’s response to our actions has been measured a) No real negative consequences to Qassem Suleimani b) Instability is not a harm unique to targeted killing c) We are already at war in Iraq 5) A3: Expecting the UN to act is a false hope a) US national security and international security were threatened by Qassem Suleimani b) As hegemon we can’t avoid responsibility for policing the world
	1) N1: Targeted killing is necessary to fight terrorism a) Qassem Suleimani was responsible for over 600 US deaths, causing instability b) Killing fought terrorism; quick, non-invasion 2) N2: Targeted killing is needed for deterrence a) US must be able to back up threats b) E.g., during the cold war nuclear weapons and threat of destruction kept peace with USSR c) Organizations like the UN exist due to US pressure 3) N3: Targeted killing is a necessary policy option a) E.g., similar to nuclear weapons b) Provides an option useful in limited situations c) Geneva Convention permits retaliation	1) N1: Qassem Suleimani is the only example given by Neg a) Attacks on ISIS and others were not on government officials b) Qassem Suelimani intelligence may not be accurate or reliable i) E.g., invasion of Iraq, Pentagon Papers re Vietnam war c) Iraq instability caused by US actions, led to Iran hostility 2) N2: Nukes are not a good analogy for assassination a) Killing government officials causes a power vacuum b) Other countries don’t agree with our policy, e.g., UK	1) N1: Aff doesn’t dispute that Qassem Suleimani was a terrorist a) This example proves the Neg case b) We are retaliating for terrorist acts

<sup>2</sup> “A1” indicates the Affirmative first contention, “N2” the Negative second contention and so forth.
